

New Beginnings and Forever Homes

Barn Cat Adoption Application

If you have a barn, stable, farm, store or warehouse you can help save lives!

Barn cats are an environmentally friendly way to help you control rodent population without using poison. Prior to adoption, all the cats will be spayed/neutered, dewormed and vaccinated for FVRCP and rabies. Sometimes we rescue cats from a situation in which they may have been living in a colony, cannot be fully domesticated, or are just much happier outside no matter what we do. We recommend adopting multiple barn cats where possible in order to ease the transition for the animals. It is good if they can continue to have a "buddy system" rather than be alone. If you think you can offer this kind of home to some barn cats, please complete the application below. By placing these cats into barn settings, we can open up these foster homes to rescue more cats!

Applicant Information

First Name _____ Last Name _____

Business Name (if applicable) _____

Address _____

City _____ State _____ Zip Code _____

Email _____

Phone _____

Property Information

Type of Location _____

Do you own the property? Yes ___ No ___

Does someone reside on the property? Yes ___ No ___ If so, Who? _____

Please describe the size and condition of the property. _____

Please describe the structure where the cats will be housed. _____

How far is the building from the road/traffic? _____

If you were to sell/move from the property, what would your plan for the cats be? _____

Please tell us about other pets that you have had / Have _____

Name of Veterinarian _____

Address _____ Phone _____

Have you had barn cats before? Yes ___ No ___

If yes, what happened to them? _____

It is imperative that the cats be confined to a small area for 2-4 weeks to acclimate to their new surroundings.

Are you prepared to allow that much time? Yes ___ No ___
